## INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP2004/004331

	CATION OF SUBJECT MATTER  C07K16/18, A61K39/395, A61P3  C12N15/00	5/00, 43/00//C12P21/08,		
According to International Patent Classification (IPC) or to both national classification and IPC				
B. FIELDS SEARCHED .				
Minimum docur Int.Cl	nentation searched (classification system followed by c 7 C07K16/18, A61K39/395, A61P3	lassification symbols) 5/00, 43/00		
Documentation s	searched other than minimum documentation to the ext	ent that such documents are included in the	e fields searched	
	pase consulted during the international search (name of ALOG), BIOSIS (DIALOG)	data base and, where practicable, search te	erms used)	
C. DOCUMEN	NTS CONSIDERED TO BE RELEVANT	<u> </u>		
Category*	Citation of document, with indication, where a	ppropriate, of the relevant passages	Relevant to claim No.	
X A	Liang R. et al., "Human Inter Cotransporter.", J.Biol.Chem No.12, pages 6456 to 6463		1-4,8-10 .5-7,11-15	
XA	Liu W. et al., "Molecular clo a new member of the H <sup>+</sup> /peptic family, from human kidney.", Biochim.Biophys.Acta., 1995, to 466	de cotransporter	1,2,4,8,9 3,5-7,10-15	
P,A	WO 03/033024 A1 (Chugai Phar Ltd.), 24 April, 2003 (24.04.03), (Family: none)	maceutical Co.,	1–15	
Further do	currents are listed in the continuation of Box C.	See patent family annex.		
"A" document defining the general state of the art which is not considered to be of particular relevance  "E" earlier application or patent but published on or after the international filing date  "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)  "O" document referring to an oral disclosure, use, exhibition or other means document published prior to the international filing date but later than		"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone.  "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art  "&" document member of the same patent family		
Date of the actual completion of the international search 09 June, 2004 (09.06.04)		Date of mailing of the international search report 22 June, 2004 (22.06.04)		
Name and mailing address of the ISA/ Japanese Patent Office		Authorized officer  Telephone No.		
Facsimile No: Telephone No				

## INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP2004/004331

Box No. I	Nucleotide and/or amino acid sequence(s) (Continuation of item1.b of the first sheet)		
With reg     invention	ard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed a, the international search was carried out on the basis of:		
a. typ	e of material		
×	a sequence listing		
	table(s) related to the sequence listing		
b. for	mat of material		
	in written format		
· 🗵	in computer readable form		
c, tim	e of filing/furnishing		
	contained in the international application as filed		
. 🔀	filed together with the international application in computer readable form		
	furnished subsequently to this Authority for the purposes of search		
2. 🔀 In	addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed		
or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.			
3. Addition	nal comments:
